Boost Your Farming Operations With Powerful Analytics

AGRIVI 360 FMS

Farm Management

Market-leading farm management software **enabling large agribusiness companies to control complex farm operations, make data-driven decisions, optimize cost and improve yields** based on real-time insights and advanced field analytics.

CENTRAL FARM OPERATIONS MANAGEMENT

One platform for all **agricultural data** and process management, easily accessible anytime and anywhere. Create a digital twin of your farm.

ADVANCED CROP PLANNING

Plan better and **budget your season with precision** based on a 360 overview of agronomic, financial and operational plans by crop and field.

REAL-TIME FIELD INSIGHTS

Make **fact-based decisions based on real-time insights** into weather conditions, pest risk and crop health by field. Analyze satellite data and operations management data by field.

POWERFUL FARM ANALYTICS

Gain deep insights into best performing fields, varieties and practices. **Identify inefficiencies, make the right decisions to optimize costs, improve crop yields and profitability.**

TRACEABILITY AND COMPLIANCE REPORTS

Ensure complete crop production traceability and secure compliance with food quality, food safety and sustainability standards such as ISO 9001, Global GAP and HACCP.

AGRIVI Digital Agriculture Solutions

We empower farmers and agrifood companies with **powerful digital agriculture solutions to digitalize their farm business, improve food transparency and safety**, and to **support farmers** with trusted and reliable advice and knowledge **powered by AI**.

Engage

White-labeled AI Agent product, **tailor-made to support AgriFood companies to engage with farmers** and nurture strong relationships with them by bringing trusted and reliable advice and knowledge via WhatsApp and Viber chat platforms.

AGRIVI AI

AGRIVI 360 Farm Management Software

Farm Enterprise

Market leading farm management software supporting farmers with data-driven tools and real-time insights from the field to make precise agronomic and economic decisions and **maximize productivity and profitability**.

Traceability

Digital solution for **complete food production traceability**, by giving food and retail companies the ability to provide transparent insight into the lifecycle of fresh or processed food products to the end customers, from seed to shelves.
